LETTER TO INVESTORS

HELLO!

In 2019 we took both small steps and huge leaps on our road to building the investment firm where thoughtful Canadians invest. Along the way, we put you, the investor, at the centre of everything we do. Our focus remains on creating industry-leading investment products that help you build a resilient portfolio so you reach your long-term objectives and achieve success that truly matters.

We'll continue iterating and evolving our products to help drive the investment outcomes you're looking for. In the past year, we became one of the first investment firms in the world to embed Environmental, Social and Governance (ESG) principles across our entire investment process, rightfully placing them at the foundation of how we think about building products. This means that, as an investor in Purpose, you now benefit from superior returns while also strategically investing capital in companies that make the world a better place.

“As an investor in Purpose, you now benefit from superior returns while also strategically investing capital in companies that make the world a better place.”

Some key milestones drove our success as we surpassed \$8-billion in assets under management. We launched new one-of-a-kind products, including a Canadian-first income fund that provides a 6% income with a structured exposure to reduce market downside risk. We gave more investors access to Canada's first global, multi-manager private debt fund by making it available for regular ongoing investments.

And following changes in mutual fund regulations we created our top alternative credit strategy by evolving it from a fund only available to accredited high net worth clients into a mutual fund for all investors.

While we continued to debut new products, some of our first liquid alternatives funds crossed their 5-year anniversaries, including our first hedged equity strategy offered as an ETF or mutual fund to all Canadians. Our time-tested expertise in this space has allowed us to continue to lead the way and continuously add to our line-up, including funds we created based on feedback from our investors.

As we've evolved, the industry has changed dramatically. However, the core of who we are has not. It was time for us to reimagine our brand and tell our story in a way that encompasses the energy that drives us now. You might already have seen it take shape in our new advertising on Air Canada and our refreshed website at purposeinvest.com.

Our commitment to focusing on transparency and choice, long-term outcomes before benchmarks, fair value for money,

proactive risk protection, comprehensive ESG strategies and a tax-efficient approach to liquidity makes us the place where thoughtful Canadians invest. Every facet of our brand story reflects our principles and ensures that the investors who've joined us see themselves and their personal successes in everything that we do.

That constant focus on living up to our principles is what makes us different. And, ultimately, they help us create for you the type of investment experience we want for ourselves.

I'm more excited than ever to see how the potential of Purpose Investments will be realized for our investors in 2020. Though markets entered the year strong, there's a continued sense of unease and disruption as the market determines how best to deal with the global challenges presented by the spread of coronavirus. As always, our approaches to active management and built-in risk mitigation ensure we're taking the right measures to protect our partners and investors. We believe that approach is more important now than ever.

By always focusing first on objectives that matter to our investors we produced very strong returns for our clients in 2019 and we'll continue to follow that path in 2020 and beyond.

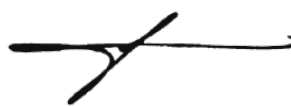

I want to thank the incredible team of owner-minded partners that make up Purpose Investments. Together, we care deeply about helping investors like you surpass your goals. Their relentless drive to continue envisioning what a modern asset management firm can be inspires me every single day.

Finally, and most importantly of all, Purpose Investments exists to help build the success of our customers, investors and partners. I want to personally thank you for your support and for being a part of our growing story. We know that when you win, we win. We're humbled and honoured that you've placed your trust in us and we don't take it for granted.

“We know that when you win, we win.”

I can't wait to share with you everything we're continuing to build and I know, more than ever, that together we'll continue to create meaningful success for thoughtful investors like you in the new year and beyond.

Warmly,

Som Seif
CEO
Purpose Investments Inc.

ANNUAL MANAGEMENT REPORT OF FUND PERFORMANCE

The management report of fund performance presents the views of the portfolio management team concerning significant factors and developments that have affected the Fund's performance and outlook.

Please read the caution on the inside of the cover page regarding forward-looking statements.

INVESTMENT OBJECTIVES AND STRATEGIES

Purpose Canadian Preferred Share Fund principally seeks to provide a consistent stream of income with potential for capital appreciation by investing in Canadian income producing securities and Canadian equities.

The Fund will invest in Canadian preferred securities, with a focus on floating rate preferred securities; dividend paying Canadian equities; income and royalty trusts; ETFs; and fixed-income investments, with a view to consistent interest or distribution payments. Investments in floating rate preferred securities will be of Canadian issuers whose debt, at a minimum, has an investment grade rating at the time of purchase.

The Portfolio Advisor uses a top-down and bottom-up investment process, focusing on the risk return relationship of individual securities within a diversified portfolio. The process includes a macroeconomic forecast for the respective global and local economies, establishing investment themes and industries to overweight or underweight based on the Portfolio Advisor's outlook for a particular sector, view of current market trends and phase of the economic cycle. Fundamental research is used to select securities believed to offer attractive risk-adjusted returns based on the Portfolio Advisor's view of a company's growth prospects.

However, the Investment Advisor will be watchful for signs of weakening domestic data, as well as further weakening trends outside the US. As such, the Investment Advisor acknowledges the possible need to adjust our outlook and the Fund's subsequent positioning.

RISK

The risks of investing in the Fund are disclosed in the Fund's prospectus and there have been no significant changes during the year that affected the overall level of risk associated with the Fund.

RESULTS OF OPERATIONS

The Fund offers ETF units listed on the Aequitas NEO Exchange under the ticker RPS and mutual fund classes.

The net asset value per unit as at:

|-----------|------------------------------|------------------------------|
| ETF Units | 19.99 | 20.98 |
| Class A | 8.21 | 8.69 |
| Class F | 6.29 | 6.60 |

During the year ended December 31, 2019 the Fund paid distributions as follows:

| Month | ETF Units | Class A | Class F |

| January | 0.0950 | 0.0396 | 0.0299 |
| February | 0.0950 | 0.0396 | 0.0299 |

| April | 0.0950 | 0.0396 | 0.0299 |
| May | 0.0950 | 0.0396 | 0.0299 |

| Total | 1.1400 | 0.4752 | 0.3588 |

Market outlooks were very muted for the reference period, the full-year 2019, but the actual results were quite strong. Markets did not shy away from fairly significant fluctuations throughout the year, however. Trade tensions between China and the US, uncertainty over the direction of interest rates, a mid-year spike in recession fears and yield-curve inversions all contributed to periods of weakness, particularly in the late spring and late summer months.

Fixed income produced strong returns, as bond yields broadly moved lower through the first half of the year. Yields moved higher in the latter half of 2019, but still finished well below the year-end levels of 2018. Corporate bonds slightly outperformed government bonds amid narrowing credit spreads fed by the increasing appetite for risk. Preferred shares were modestly positive despite a mid-year slump.

Fund performance was modestly positive over the reference period, with improving performance towards the end of the period. Returns were sourced broadly from most sectors, however preferred shares among energy companies, in particular pipeline operators, were especially weak over the period, reducing overall performance significantly.

RECENT DEVELOPMENTS

There were no changes to the Manager of the Fund, nor were there any material changes to the investment philosophy or process. Positioning and the Manager's outlook remain the same.

Notes:

1) The financial information presented in the Ratios and Supplemental Data table is derived from the Fund's net asset value calculated for fund pricing purposes ("NAV") and is provided as at December 31 of the year shown.

2) The management expense ratio ("MER") is calculated as the total expenses, excluding distributions, commissions and other portfolio transaction costs, for the stated period and is expressed as an annualized percentage of the average daily NAV of the Fund. The Manager, at its sole discretion, may waive management fees or absorb expenses. Such waivers and absorptions can be terminated at any time. If the Fund invests in underlying funds managed by the Manager, the Manager does not charge management fees and administrative fees that would result in the duplication of a fee for the same services.

3) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of the Fund's daily average NAV. The trading expense ratio is calculated at the portfolio level and applies to all classes of units of the Fund.

4) The portfolio turnover rate is calculated at the portfolio level based on the lesser of purchases or proceeds of sales of securities for the period, excluding cash, short-term notes, and bonds having maturity dates at acquisition of one year or less, divided by the average value of the portfolio securities for the period. The Fund's portfolio turnover rate indicates how actively the Fund's investment sub-advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher the portfolio turnover rate in a year, the greater the trading costs payable in the year and the greater the chance of taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and fund performance. The portfolio turnover rate is calculated at the portfolio level and applies to all classes of units of the Fund.
